

PlateCrafters

is proud to offer

Hot Stamping & Embossing Dies

MAGNESIUM

Platecrafters continues to be a leading supplier of magnesium dies to the industry. We exclusively use Masteretch processing machines, featuring refrigerant cooling. Refrigerant cooling is far superior to water cooling, resulting in tight shoulders on a consistent basis.

HOT STAMPING DIES

Our .25 inch stamping dies routinely are shipped same day. You specify the relief and any special trimming requirements.

MOUNTED 16 GAUGE

Also shipped same day. We can wood route or provide any other special trimming.

16 GAUGE

When used for molding rubber, our engravings are unsurpassed. Since we routinely use our own engraving for molding rubber plates, we constantly monitor relief, shoulders and the surface of the engraving to insure the easy separation of the engraving from the molding board.

EMBOSSING

As with stamping dies, turnaround is always same day. You specify the amount of depth, or tell us the stock thickness and we'll select an optimum relief. Of course, counters are available when requested.

COPPER

When run length or fine detail are an issue, the perfect solution is to use our copper dies. Whether hot stamping or embossing, our skilled craftsmen consistently produce a superior product with the goal of increasing your quality and profitability.

INTAGLIO

When fine stationary is called for, our 16 gauge copper intaglio dies are flawless and routinely shipped same day.
